Success story

In May 2023, the "Simulations and Industrial Digital Technology Company" emerged as a remarkable success story, founded by entrepreneurs Abdullah Mohammed Al Wahabi and Yahya Mohammed Mahboub. With a focus on electronic circuit design, device development, and a commitment to innovation, the company quickly became a successful venture.

Simulations Company thrived on a culture of passion and commitment, leveraging the diverse skills of its founders for consecutive successes, expanding its customer base, and delivering advanced technological solutions.

Who are we

We, the 'Simulators and Industrial Digital Technology' company, pride ourselves on a solid commitment to the quality of our services and the scarcity of specialized human resources that distinguish us. Our products stand out for their professional execution, a factor that sets us apart in our .market

We always place our study of Arab and foreign markets at the core of our strategy, aiming to keep pace with modern technologies and ideas. We embody this analysis in our products, taking pride in delivering items that our clients are proud of. We are capable of flexibly and efficiently meeting all the requirements of government entities, private companies, .and individuals

Our Vision

The vision of 'Simulators and Industrial Digital Technology' is to actively contribute to the development of the information technology sector. We strive to create innovative solutions that align with the highest international standards, aiming to elevate the sector according to global benchmarks and recognized international standards.

In the current challenging landscape and intense competition of our time, we are dedicated to achieving a leading position in the market. Offering a diverse range of services to meet local market needs, we consistently focus on their development using modern technologies and collaboration with strategic partners, leveraging high-quality resources. Our goal is to assist our clients in overcoming all challenges

Our Mission

At 'Similar and Industrial Digital Technology,' we are dedicated to consistently meeting and exceeding our clients' expectations by continuously developing our services at competitive prices. We also aim to enhance our operational efficiency by employing proven methods and attracting highly skilled individuals to join our team. Additionally, we strive to utilize innovative technological solutions to improve our efficiency and effectively meet the needs of our clients.

We take pride in our diverse expertise, enabling us to efficiently and effectively conduct all business operations. Our commitment to excellence and continuous improvement reflects our vision of delivering superior and efficient services, as we persistently work towards enhancing our performance and excelling in the field of technology.

Values

- Simulators and Industrial Digital Technology Company shines with deeply rooted values that serve as the foundation for our approach and direction.
- **Passion for Excellence:** We consider the passion for excellence a fundamental driving force in all our endeavors. Striving to achieve our goals with an inspiring spirit that goes beyond mere profit-making, our inspiration lies in motivating us to deliver the best services and solutions.
- **Leadership, Innovation, and Creativity:** We embody a spirit of leadership in all aspects of our business. Relying on creativity and innovation as a way of life, we constantly seek to achieve our objectives through forward-thinking and contributing to the development of our national industry.

- Integrity and Transparency: Integrity and transparency are integral to all our interactions. Ethical dealings with our clients are essential for building trust, enabling us to continue achieving mutual success.
- Excellence and Team Spirit: Our team of highly skilled experts strives for excellence in their performance. We take pride in an integrated work environment and team spirit that promotes collaboration and mutual respect, contributing to the efficient and effective achievement of our goals

Our Goals

- At 'Simulators and Industrial Digital Technology' company, our goals are manifested in advancing the field of information technology and excelling in various aspects through:
- Continuous development in the field of information technology: We strive to enhance and develop our expertise in information technology, placing significant emphasis on staying abreast of all that is new and innovative in this field.
- Participation in events and conferences: We work to enrich our knowledge and experiences through active participation in specialized events, conferences, and seminars. This contributes to raising awareness and competence in our field of work.

- Providing exceptional quality products and services: We aim to deliver high-quality products and services to support our clients and help them gain a competitive edge in their sectors. Achieving customer satisfaction and surpassing their expectations is a key priority for the company.
- Job opportunities: We believe in the importance of building a diverse and qualified team to achieve our goals and meet our future aspirations."

Our services

Our services at 'Similar and Industrial Digital Technology' company reflect our commitment to providing the best innovative and interactive training solutions. We offer:

1

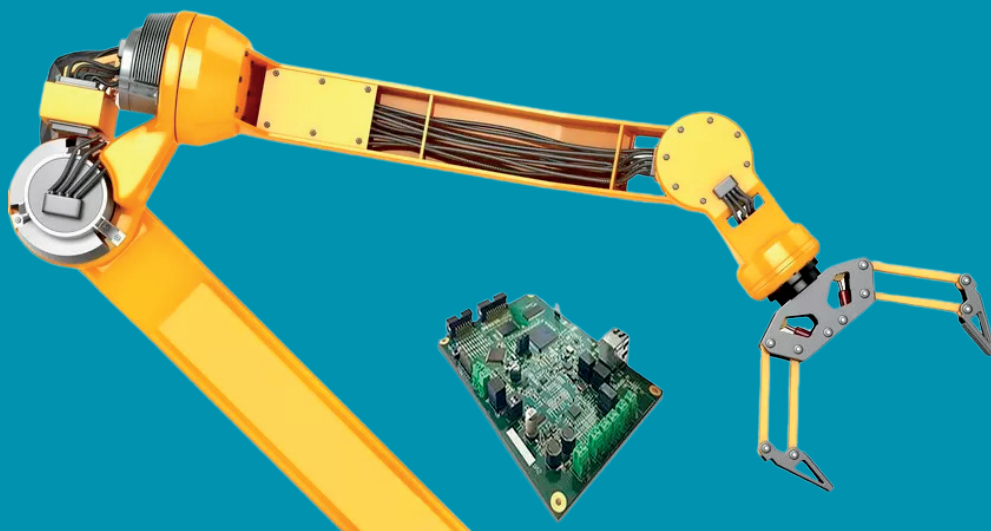

- Our services in 'Interactive Computer-Based Simulators Construction':

We offer advanced training simulators for all electrical and mechanical operating systems, with a focus on providing an interactive experience that enables trainees to comprehensively acquire skills.

2

- Construction of interactive training simulators for radar systems:

We develop advanced computer-based interactive simulators for radar systems, allowing trainees to understand and apply concepts effectively and practically.

3

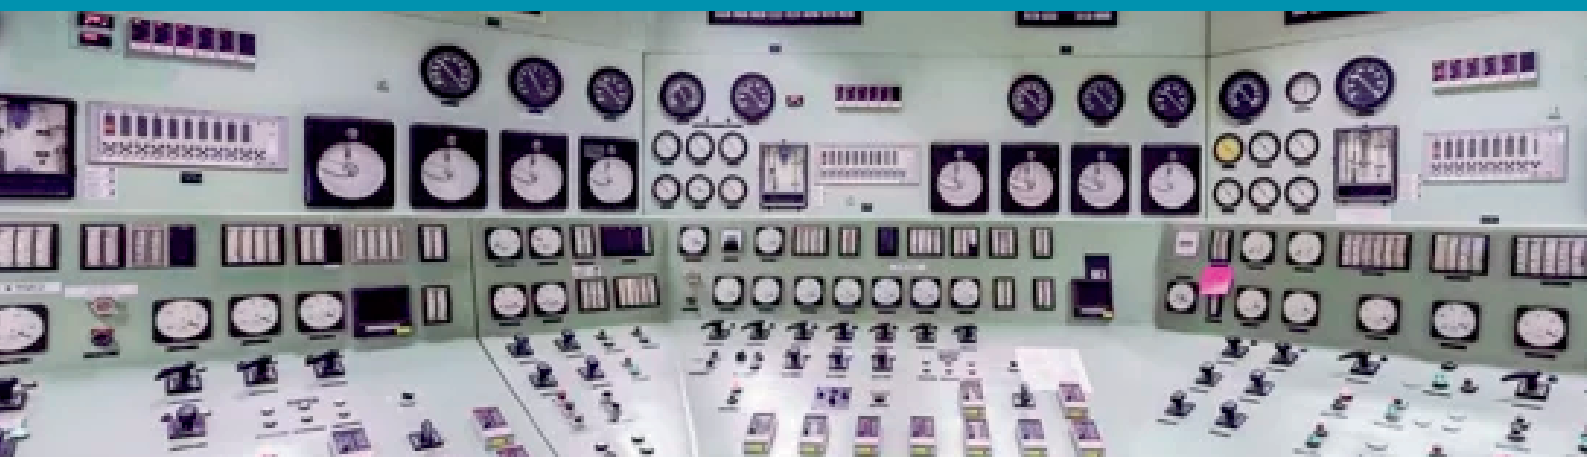

Building 3D applications for hands-on maintenance training:

We offer three-dimensional applications for comprehensive maintenance training on all electrical and electronic-mechanical systems, contributing to enhancing trainees' understanding and practical skills.

4

- Operating Training Systems with Artificial Intelligence:

We leverage artificial intelligence techniques to operate and enhance malfunctioning or outdated training systems, ensuring their efficient functionality with modern operating systems. In addition, we specialize in building advanced computer-based interactive simulators for radar systems. These simulators are designed to empower trainees, allowing them to comprehend and apply radar system concepts effectively in a practical manner."

5

Building Digital Control and Monitoring Systems:

We specialize in constructing digital control and monitoring systems for any electrical or mechanical system lacking a digital control system, ensuring operational and monitoring efficiency. Additionally, we develop advanced computer-based interactive simulators for radar systems, providing trainees with a comprehensive solution to understand and apply concepts effectively in a practical manner. This integrated approach reflects our commitment to offering innovative solutions in both digital control systems and radar system training simulators."
